Ship x Cyber Security x e-learning

Cyber security measures on ships are now attracting attention!

Why is cyber security measures on ships attracting attention?

- The shipping industry plays a very important role in the world's logistics infrastructure, so if a cyber security incident occurs, the impact on the global economy will be enormous.
- With the spread of "Ship IoT" and other technologies, two-way communication between ships and land is accelerating year by year, and cyber security risks on ships are expected to increase in the future.
- If a cyber security incident occurs on a vessel, not only important information may be leaked or financial damage may be incurred, but also the safe operation of the vessel may be hindered, resulting in a serious incident such as grounding or collision.

Don't you have this kind of problem?

I know cyber security is important, but it is hard to have group training and briefing sessions because the crew changes so often.

Cybersecurity measures seem likely to be difficult and expensive.

Most of the cyber security teaching materials specialized in the shipping industry are in English, so I wish they had Japanese teaching materials.

You can take cyber security measures on ships from anywhere with ease by
Maritime Cyber Security Awareness Training!

What is Maritime Cyber Security Awareness Training?

This is the e-learning service which conforms to Section 5.3 of the BIMCO Cyber Security Guidelines.

Learning from anywhere as long as the you can access to the Internet.

No need to download app software. You can learn via browser.

Smart device support makes it easy to use even if you're not used to using a PC.

Our service is affordable compared to other companies' services.

The teaching materials are available in Japanese and English.

You can manage participants information and grades with Administrator function.

ClassNK Consulting Service Co., Ltd. issues the Certificate of Completion to those who have completed the course.

We can issue a valid demo ID for a month. (Please contact us for details.)

↑ Sample of the Certificate of Completion
