Condition evaluation for seven general cargos chartered by NYK Bulk & Projects Carriers Ltd.

ClassNK Consulting Service Co., Ltd. has conducted condition evaluation for seven general cargos chartered by NYK Bulk & Projects Carriers Ltd.

We provide services to check and report on condition of vessels on behalf of charterers and shipowners by our experts, including those with experience in supervising shipbuilding or repair operations. In response to a request from NYK Bulk & Projects Carriers Ltd, we conducted a condition evaluation, which included a survey of hull construction and machinery equipment that should be repaired or replaced during docking or voyages in consideration of the future charter period, and compiled the results into a report, using a 360 camera, which makes it impossible to arbitrarily limit the areas to be photographed, and thus provides an accurate evaluation of the current condition objectively

We will continue to provide a wide range of services to meet the needs of charterers, shipowners, or other customers, including condition evaluation of returned vessels or cost estimates based on the grade of repair at the next docking.
